Cadastral sheet excerpt

Impacts of the e-services

Hellenic Cadastre e-services presented to the Prime Minister's Cabinet in April 2021

The developed web-based functionality:

- Provides online, 24/7, direct access to cadastral data and services to all those who have a legitimate interest in the cadastral data.
- Enables easy access through a wellknown focal e-governmental portal.
- Eliminates the need for individuals to visit cadastral offices.
- Avoids congestion in the cadastral offices.
- Delivers a faster service to those interested in land transactions.
- Provides a speedier resolution of cadastral registration problems.
- Improves support for planning and developmental activities.

The services have had a very positive impact and a significant number of users (in 10,000's) use them on a daily basis. \Box

LE

Summary and conclusions

Cadastral map of the Acropolis in Athens, as it is depicted in the Hellenic Cadastre's Geoportal "Providing access to cadastral data is one of the major goals that the Hellenic Cadastre.

The development of a new set of services that enables citizens and professionals to access directly cadastral data on a 24/7 basis, constitutes a major step towards that direction.

Such a capability not only helps citizens and professionals to satisfy their everyday needs as far as cadastral needs are concerned, but also opens-up use of cadastral data in a wide range of tasks and applications."

d.

Prof. Dimitrios Stathakis, HC President of BoD
